- ★ Hours and hours of fun that will challenge your wits, your memory and your mind.
- ★ Exciting computer version of one of the most popular card games ever!

SOLITAIRE

You are alone on a beautiful tropical beach, palm trees sway in the warm summer breeze. The songs of a thousand exotic birds fill the air. You don't have a worry in the world. Just kick back and get ready to experience one of the most popular card games ever - Solitaire.

If you have never played Solitaire, you are about to become one of the millions who love this challenging game. It doesn't take quick reflexes, it takes thinking, strategy... and a little luck. Just take your time. After all, you are in no hurry, you've got many enjoyable hours ahead.

The Origin of Solitaire

Solitaire first became popular during the Klondike Gold Rush of the late 1800's. Old timers say a player would wager \$50 for a pack of cards and win \$5 for each card they played on a Foundation Pile before the game was finished. This game was known as "Klondike."

About the same time, a similar style game was being played at a place called "Canfield's Gambling Hall" in Saratoga. This game had the name "Canfield" and eventually became much more popular than Klondike. Today, both Klondike and Canfield serve as alternate names for the game most people call "Solitaire."

Make sure the power switch on your control deck is turned off.

Insert the SOLITAIRE cartridge into your NES console, carefully following the power up instructions in your NES user manual.

If the screen flashes on and off, game screen looks garbled or the game will not play see page 13.

From the title screen press START to begin a game.

TITLE SCREEN

DIRECTION PAD

From the Set-up screen use the Direction Pad to chose your game options. From the main game screen use the Direction Pad to move the HAND CURSOR.

B BUTTON

The B Button is not used in Solitaire.

A BUTTON

Press to choose and move cards.

SELECT

Pressing once during game play then pressing START will begin a new game. Pressing SELECT twice will return to the current game.

START

Press START to begin new game

From the **SET-UP SCREEN** you can choose several options to fine tune the game to your liking.

CARD BACKS: Choose the card back design you prefer by pressing Right or Left on the Direction Pad. Move the HAND over your chosen pattern, press Down on the Direction Pad to move to your next option.

COLORS: Move the HAND Right or Left to select one of five color combinations. Once you've chosen your colors, press Down on the Direction Pad to move to the next option.

DRAW: Choose ONE CARD or THREE CARD by pressing Right or Left on the Direction Pad. In the One Card version of Solitaire, you deal one card from the pack at a time until you can move one of the cards into a pile. In the Three Card version of Solitaire, you deal three cards face up from the pack, but can only use the top card showing (the third card dealt). Once you've selected One Card or Three Card, press Down on the Direction Pad to move to the next option.

MUSIC: Select whether you'll play with the background music ON or OFF. Press Down on the Direction Pad to move to the next option once you've made your selection.

SOUND: Select whether you'll play with the sound effects ON or OFF. Once you've made your selection in this last category. Press START to begin the game.

THE HAND CURSOR

You can move the HAND Cursor to any card pile on the game screen by pressing the Direction Pad.

MOVING CARDS: To move a card or sequence of cards, move the HAND Cursor to the card you wish to pick-up and press the A Button. A Blue HAND will mark the card you'll be moving. Next, move the HAND to the pile you want to move the card to, press the A Button. If the move you've attempted is legal, the card or card sequence will instantly move to the new location.

ILLEGAL MOVES: The game will not allow any move that is illegal. If an attempted move is illegal, you will hear a buzz, and the Blue Hand Cursor will disappear. You can now choose a new move.

How to play the game of Solitaire.

The top row is made up of the Pack and the Foundation Cards. Seven cards are dealt across, face down forming seven columns. Next, six cards are dealt face down, starting at the second column and over-lapping the first row dealt. Five cards are then dealt face down starting at the third row, then four cards starting at the fourth row, then three cards starting at the fifth row, etc. until a total of 28 cards have been dealt.

The card at the bottom of each column is now turned face up, and the remainder of the cards are placed at the upper left corner of the screen. The four empty spaces at the top of the screen are called the Foundation Piles. Any Aces that are turned up during game play can be placed in a Foundation Pile and built upon by placing a card of the next number sequence and the same suit on top of it (i.e. a turned-up 2♠ may be placed on top of an A♠, etc.)

After you have turned the entire Pack up, place the HAND on the far left empty Pack and press A Button. Now you can go back through the Pack again for new cards.

The object of Solitaire is to move the entire deck of cards on to the Foundation Piles. The game ends when you have done this or when you can't make any more moves.

STACKING THE CARDS

The 28 cards arranged in seven columns are called the Layout Cards. A turned-up card may be moved to another column if it can be placed on a card one higher in value and of a different color. The 4♠ could be moved on to the 5♣, or the turned-up J♥ may be placed on the Q♣.

Once a card is played or moved to another pile, the card beneath it may be turned up. Once a sequence has begun, it can only be moved as an entire unit.

The card sequence 7♥, 6♣, 5♠, 4♣ can only be moved as a unit, in this case, on to column seven, the 8♣.

COLUMNS AND KINGS

Occasionally in a game of Solitaire, you'll find yourself with an empty column. An empty column can only be filled by a King, either alone or as part of a sequence. The K♦, Q♣, J♥ sequence could be moved into the empty column.

You may also fill the column with a King that is drawn from the Pack such as K♣.

PRECAUTIONS

- * Do not store cartridge in very hot or cold places. Never hit or drop.
- * Do not take apart.
- * Do not touch connectors; do not get them wet or dirty. Doing so may damage game.
- * Do not clean with benzene, paint thinner, alcohol or other such solvents.

WARNING

DO NOT USE WITH FRONT OR REAR PROJECTION TV

Do not use a front or rear projection television with your Nintendo Entertainment System. Your projection television screen may be permanently damaged if video games with stationary images or patterns are played on your projection television. Similar damage may occur if you leave your game in PAUSE mode. If you use your projection television with NES games, American Video Entertainment, Inc. will not be liable for any damage. This situation is not caused by your NES or by American Video Entertainment games; other fixed or repetitive images may cause similar damage to a projection television. Please contact your television manufacturer for further information.

KEEPING YOUR CONSOLE CLEAN

If your cartridge will not work, produces garbled characters or causes your television screen to flash on and off you probably have a dirty internal connector (the slot where your game cartridge plugs into the NES™ console).

The Nintendo Entertainment System™ uses what is called a zero insertion force connector. Although this eliminates wear and tear on your NES™ and cartridges, to work properly it requires cleaning on a regular basis. Cleaning this connector is easy, all you need is a cleaning kit. Cleaning kits are made by Nintendo™ as well as other manufacturers and they can be purchased anywhere you buy or rent video games.

Do not be tempted to blow on the gold fingers at the end of the cartridge. This further contaminates the internal connector.

Should you have any questions, please call our Toll free 800 number and one of our game counselors will be happy to assist you.

Compliance with FCC Regulations

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radiolar and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient the receiving antenna.
- Relocate the NES with respect to the receiver.
- Move the NES away from the receiver.
- Plug the NES into a different outlet so that computer and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful:
